OFFICE MEMO

October 21, 1976

FROM: Gary F. Kulibert

SUBJECT: James Lehrer Landfill Site

On October 18, 1976, I received a call from Mr. James Lehrer concerning a recent letter I sent to him. He indicated that he didn't know what the problem was concerning Ted Harris in the submittal of engineering plans as requested by our order. He indicated he would contact Mr. Harris to see if the matter could be resolved. On October 20, 1976 I received a call from Mr. Harris who indicated in very plain language that he was not getting paid by Mr. Lehrer and therefore was not doing any work on the project. Mr. Lehrer contacted him this week and promised that a check would be in the mail. Therefore, Mr. Harris will proceed with the development of the plans and hope to have something in to our Department by the end of this month.

Dear Mr. Lehrer:

On April 29, 1976, our Department issued you Modified Order #2A-75-1045A. This order required you to do certain preliminary work on your landfill site to insure that it is properly engineered and located to prevent environmental degradation. Throughout the summer we have received comments why this information had not been submitted by the May 28, 1976 deadline date. As of this time we have received the final hydrogeologic engineering report, however, no preliminary engineering plans have been submitted to date. Unless action is taken on this in the immediate future this office will recommend this matter be referred to the Attorney General's office for prosecution.

If you have any comments or any questions concerning this matter or in need of technical assistance please do not hesitate in contacting this office, 414-494-9601.

Very truly yours,

Gary F. Kulibert
